Factors Influencing the Provision of Turnaround Finance to Financially Distressed Companies in SA Mar 09 2022 The major theme of the research relates to the factors which influence the provision of turnaround finance to financially distressed companies in South Africa. The purpose of this study is to identify and investigate the factors influencing the provision of turnaround finance from a macro-environmental, industry-wide, and company-specific perspective. The key findings in relation to the influencing factors were distilled into broad recommendations for consideration by the shareholders and managers of financially distressed companies when attempting to secure turnaround finance. The study employed the use of semi-structured, elite interviews with senior executives within the professional fields of law, corporate finance, specialist finance, and turnaround management in an effort to incorporate a wider context in relation to the research problem and to overcome the limited data phenomenon relating to researching turnaround situations. The findings of the study are that the provision of turnaround finance to distressed companies represents a means to restore corporate value in economically viable distressed companies and the factors which influence the provision thereof exhibit interrelationship which shareholders and managers of distressed companies need to understand and appreciate in order to successfully secure turnaround finance.

Corporate Turnaround Artistry Nov 17 2022 How to steer your business through times of financial distress and achieve sustained profitability
Corporate Turnaround Artistry is a complete guide for entrepreneurial companies in times of financial distress—presenting effective strategies and proven methods to revive and rehabilitate your business. Uncertain economic times have significantly altered the financial resources available to struggling businesses. Narrowing margins and mounting internal and external pressure has taken their toll on many companies. Fortunately, most businesses can be repaired while maintaining their existing revenue structure. Offering practical steps that go beyond simple cost-cutting and sales-building advice, this invaluable guide teaches you how to control cash, secure financial relief, and develop a comprehensive turnaround plan that your employees, customers, and creditors will support. Business leaders and entrepreneurs often fall into the trap of assuming new debt when tough times strike. Author and Certified Turnaround Practitioner Jeff Sands shows that to many struggling businesses, more money is no longer the answer to the problem. Expert advice on topics including cashflow stabilization, short and long-term profit sustainability, lean management techniques, and more, provides the framework to timely and efficient corporate turnaround. From identifying the initial cash crisis to meeting with creditors and developing a plan, this essential resource will help you: Stabilize your financial liabilities and re-structure your debt Implement effective turnaround strategies without significant changes to your corporate structure Preserve the positions of your current employees and their community Give yourself a fresh start with a lean and agile business Thousands of businesses fall into financial stress every year—oftentimes in sudden and dramatic fashion—leaving CEOs and owners asking the question “How do I save my business”? Corporate Turnaround Artistry: Fix Any Business in 100 Days provides the answer.

Financial Distress and Corporate Turnaround Feb 20 2023 The work of Martin Schmuck empirically investigates the phenomenon of financial distress and corporate turnaround in the automotive supplier industry. Based on a sample of 194 publicly listed automotive suppliers, the effectiveness of managerial, operational, financial, and asset restructuring activities is analyzed in a multivariate research setting. Archetypes for successful turnarounds are identified and matched with strategies of non-distressed companies.

Corporate Distress and Stakeholder Relations Jul 13 2022 Corporate distress remains one of the most discussed topics in academic as well as management literature. Apart from the prevention of financial and economic distress, the turnaround of already affected entities represents one of the major concerns of this research field. Despite the high interest in the topic and the quantity of research conducted during the past decades, the understanding of corporate turnarounds is still limited. Recent examples of corporate crises have shown an increasing involvement of the public and the whole stakeholder network. Under this premise, the presented thesis analyzes the turnaround process of a distressed company. Drawing from theoretical concepts and practical insights, the objective of the analysis is to examine the interactions of the firm and its stakeholders during the turnaround situation; thus, to accentuate the consequences and dynamics of the relations. For this purpose, a combined process framework linking the turnaround process to an enhanced stakeholder map is derived. As result, the discussion along this turnaround model reveals distinct patterns of relevance for the specified stakeholder groups. These findings, together with the proposed framework, shall encourage further research within this subject.

Financial Strategies for Distressed Companies Jan 07 2022 The financial markets have undergone a significant development process, both qualitatively and quantitatively, and partly induced by major pushes for globalization and deregulation. In this context, finance has taken on an increasingly central role for companies and is now on par with production and sales, which have always been the cornerstones of business management. The effects of these structural and functional changes are not limited to the way companies operate, but also imply a change in corporate cultures; one consequence of this phenomenon is the large percentage of managers from the world of finance at the top tiers of corporate organizations. Moreover, environmental turbulence has forced companies to increasingly face negative situations characterized by economic and financial imbalances that may require far-reaching strategic changes. The purpose of this book, therefore, is to investigate the possible financial strategies that companies in distress can adopt; in this regard, it approaches financial strategies as opportunities to resolve and prevent difficult situations for the company. After having systematized the financial strategies and policies used in the governance of companies, the book analyzes both crises and turnaround processes, describing the path until the financial balance is restored. Finally, the authors analyze essential tools for the financial management of companies in trouble, focusing in particular on operational tools for managing the crisis, the recovery plan, and its monitoring.

Academic Turnarounds Oct 12 2019 What are the hallmarks of a lasting institutional turnaround? It is too easy to mistake a single initiative mounting a new marketing program, for example, or bringing in a million dollar donation for a true turnaround. Successful turnarounds involve profound, often difficult, actions that affect the finances, academic offerings, and reputations of colleges and universities. They take institutions to new levels of performance and then present new challenges. MacTaggart examines the several stages that comprise institutional turnarounds and offers practical advice on setting and reaching higher levels of performance. MacTaggart also discusses the early indicators of a college or university's need for a turnaround. He and his colleagues outline financial trends and other indicators of distress, as well as benchmarks for the various stages in an effective turnaround strategy. Academic Turnarounds will help trustees, presidents, and faculty members diagnose whether or not they are in denial over the true condition of the institution they are charged with preserving. Donors, state officials, accreditors, and others interested in the quality and vitality of American higher education will find direction in this book.

Red to Black: The Art of the Corporate Turnaround Aug 22 2020 Everywhere you look, businesses are closing their doors - both recent startups and long-standing establishments. No matter which statistics you read, it seems that the odds are against success for small-to-medium-sized businesses. Is closing the doors inevitable once the balance sheet reads red so many months in a row? Perry M. Anderson replies with a resounding No! This book offers hope and help to distressed business owners and managers in need of an immediate turn-around solution. Perry understands that it is not "just a business." Instead, it is the livelihoods that real families depend on. Appreciative of the urgency with which complex and high-impact decisions must be made, he delineates those tasks that must be done now in order to stave off the creditors, and the steps to undertake next in bringing the company back from the brink. In compassionate yet no-nonsense terms, Mr. Anderson shines a light through the shadow of bankruptcy onto the

landscape of business turnaround.

Turnaround Management and Bankruptcy Aug 02 2021 Written by leading experts in the field of business, finance, law and economics, this edited volume brings together the latest thoughts and developments on turnaround management and business rescue from an academic, judiciary and turnaround/insolvency practitioner perspective. Turnaround Management and Bankruptcy presents different viewpoints on turnarounds and business rescue in Europe. Presenting a state-of-the-art review of failure research in finance, such as on bankruptcy prediction, causes of decline, or distressed asset valuation. It also presents the latest insights from turnaround management research as well as giving a contemporary insight into law debates on insolvency legislation reform, cross-border judicial issues, bankruptcy decision-making by judges and competition policy in distressed economies. Finally, the book provides a regional and sector perspective on how the current crisis affects Europe, its government policies and industry performance. In this way, the volume presents a modern, interdisciplinary and scholarly overview of the latest insights, issues and debates in turnaround management and business rescue, developing a European perspective in an attempt to redress the predominance of an American orientation in the academic literature. It aims at a wider audience interested in turnarounds and failure, such as faculty and students in the fields of law, business, economics, accountancy, finance, strategic management, and marketing, but also at judges, insolvency practitioners, lawyers, accountants and turnaround professionals, as well as the EU and government officials, staff of trade unions and employer's associations.

Turnaround and Crisis Management Feb 14 2020 There are many books on business but very few on turnaround management. Yet, to turn around a distressed business is one of the most crucial challenges of a manager: You have to get it right first time, there is no room for failure and a lot of people's jobs and livelihoods depend on the turnaround manager doing a good job. This book is written by a practitioner, for practitioners and tells about practitioners. About the successful and the not so successful, offering valuable lessons from both. This book has also been written with the student or novice in mind, because all too often studying is based on theory rather than on real life and its antics. Therefore this book contains exercises and questions designed to stimulate strategic thinking and to challenge conventional wisdom. Only if we constantly review our deeds and relentlessly seek new best practices, we will succeed. When writing this book, it was of particular importance to me to not just write about the "what to do." Too many books and too many consultants just tell you what to do, yet neglect to tell you the secrets of actually "how" to do it. It is easy to say "you have got to reduce your costs but without compromising quality." The real trick is how you actually do it. This book is full of "how's" and therefore a practical everyday guide, manual, some even may say "bible" for the turnaround practitioner. Real life examples, experienced by the author himself, not fiction or theoretical models make this book an exciting reading, taking you on a tour through the changes of management over time and juxtapositioning successful and failing strategies and decisions. A lifetime of over 30 years experience and learning condensed and distilled, makes Turnaround and Crisis Management unique, current, highly topical and valuable to practitioners, clients and company directors alike.

Restructuring and Turnaround of Distressed Manufacturing Firms Jan 19 2023 The author was awarded the Schmalenbach-Prize 2009 for this book. The study assesses the effectiveness of restructuring strategies as managerial countermeasures in financial distress situations. Employing an international sample (USA, UK, Germany) of 151 listed manufacturing firms facing economic peril, it applies a comprehensive research approach incorporating financial, managerial, operational, and portfolio-restructuring strategies as well as the process of their execution. The empiricism combines financial data, press statements, and publications articulating restructuring activity with a carefully selected set of statistical analysis techniques. The study finds both novel and robust evidence for the efficacy of appropriate restructuring strategies in achieving turnaround and derives a set of realizable implications for managerial practice.

Financial Distress and Corporate Turnaround Feb 08 2022 A considerable body of research aims to discriminate between companies with the potential to stem decline, or recover from extremis, from those which will ultimately fail. The literature spans a number of academic disciplines and embraces theorising, case studies and anecdote. Even so much confusion remains regarding the circumstances where recovery is feasible, and those factors and strategies likely to facilitate such recovery. The paper reviews this literature by focusing on the turnaround decision, the process and problems of reorganization and the probability of its success. The categorization of studies centres on the turnaround process to facilitate the generation of an analytical overview of findings with regard to alternative strategies which are a precondition for success. The paper concludes with a future research agenda embracing an alignment of strategy, implementation approach and the sources of financial distress.

Corporate Turnaround Mar 29 2021 When firms are doing so badly that failure seems imminent, only turnaround management can restore performance and profitability. Chief executives, directors, 'company doctors', consultants and merchant bankers (as well as investors tracking the progress of ailing businesses) can all transform their effectiveness by understanding the basic principles. The key to recovery lies in a rigorous diagnostic review followed by a stabilization programme designed to take control, overcome the immediate crisis and create cash (and a breathing-

space) for building long-term success.

Buying and Selling of Distressed Companies May 11 2022 Why would anyone want to invest in a company that has declared or is near bankruptcy? Most people would not want to touch such a stock but there are many who specialize in this very field. Distressed securities are the

securities such as stocks, bonds, other financial claims of a company that is close to or has reached financial distress. If a company has filed for bankruptcy, it is under financial distress. This category also includes bank debt and non-performing loans. They fail to make regular interest or principal payments, and they trade at yields higher than those of similar dated Treasuries. Who would want to invest here? Once their financial distress becomes evident, there is a lot of panic selling and these then trade at deep discounts. At this stage, they present an attractive opportunity to anyone who has analysed their true worth. In recent years, private firms such as hedge funds, private equity firms have been among the largest buyers of distressed securities. They hold the securities until they have appreciated, and then sell them. This book examines the fundamental issues in relating to buying and selling of distressed companies. It is a sequel to the first highly successful book by the same author: Fundamentals of buying and selling companies.
