Language and Culture on the Margins Nov 24 2020 This collection of thirteen essays examines sociolinguistic phenomena in a wide variety of marginal environments, providing both an overview of globalization on the margins and a foundation for an expanded understanding of the processes of linguistic and cultural changes at work in these settings. Taking an expansive conceptual view of margins, the volume is organized in three parts, looking at examples of marginal spaces in the nation-state, in online environments, and in the peripheries of urban locations, globally to call attention to new and changing discursive genres, patterns, practices, and identities emerging in these spaces as a result of contemporary mobilities, the evolving global economy, and socio-

political changes. With previous research previously confined to the study of globalization in urban areas, this volume opens the door for further research on the complex sociolinguistic processes resulting from globalization on the margins, making this an ideal resource for students and scholars in sociolinguistics, globalization and heritage studies, new media, anthropology, and cultural studies.

Race, Language, and Culture May 31 2021 Anthropology... is often held to be a subject that may satisfy our curiosity regarding the early history of mankind, but of no immediate bearing upon the problems that confront us. This view has always seemed to me erroneous... In the following pages I have collected such of my writings as, I hope, will prove the validity of my point of view.

Language in Louisiana Feb 25 2021 Contributions by Lisa Abney, Patricia Anderson, Albert Camp, Katie Carmichael, Christina Schoux Casey, Nathalie Dajko, Jeffery U. Darensbourg, Dorian Dorado, Connie Eble, Daniel W. Hieber, David Kaufman, Geoffrey Kimball, Thomas A. Klingler, Bertney Langley, Linda Langley, Shane Lief, Tamara Lindner, Judith M. Maxwell, Rafael Orozco, Allison Truitt, Shana Walton, and Robin White Louisiana is often presented as a bastion of French culture and language in an otherwise English environment. The continued presence of French in south Louisiana and the struggle against the language's demise have given the state an aura of exoticism and at the same time have strained serious focus on that language. Historically, however, the state has always boasted a multicultural, polyglot population. From the scores of indigenous languages used at the time of European contact to the importation of African and European languages during the colonial period to the modern invasion of English and the arrival of new immigrant populations, Louisiana has had and continues to enjoy a rich linguistic palate. **Language in Louisiana: Community and Culture** brings together for the first time work by scholars and community activists, all experts on the cutting edge of research. In sixteen chapters, the authors present the state of languages and of linguistic research on topics such as indigenous language documentation and revival; variation in, attitudes toward, and educational opportunities in Louisiana's French varieties; current research on rural and urban dialects of English, both in south Louisiana and in the long-neglected northern parishes; and the struggles more recent immigrants face to use their heritage languages and deal with language-based regulations in public venues. This volume will be of value to both scholars and general

readers interested in a comprehensive view of Louisiana's linguistic landscape.

Language and Culture Dec 18 2022 The book presents a new theory of the relationship between language and culture in a transnational and global perspective. The fundamental view is that languages spread across cultures, and cultures spread across languages, or in other words, that linguistic and cultural practices flow through social networks in the world along partially different paths and across national structures and communities.

***Gender, Language and Culture* Aug 02 2021** This book analyzes the relationship between gender, age and role in Japanese television interviews. It covers a wide range of topics on Japanese communication; cultural and gender variables are interwoven in the interpretation of the findings. The study shows how participants interact through language and how they project their identities in the context of the interview. Based on a qualitative analysis, speech in mixed and same gender interactions is analysed, turntaking, terms of address and aizuchi (listener's responses) are examined. The findings reveal interesting characteristics of all-female interactions, such as the influence of age that appears to be more important than gender; an observation that has repercussions in the study of gender and language differences in modern Japan. This book is an interdisciplinary study that integrates notions of politeness and theories of gender and language, and will be of interest to people researching Japanese culture and communication, gender studies and institutional language.

***Language and Culture in Conflict* Oct 24 2020**

Language, Communication, and Culture Jan 27 2021 Sponsored by the International and Intercultural Communication Division of the Speech Communication Association, the goal of the International and Intercultural Communication Annual is to promote better understanding of the international and intercultural communication processes. The current volume considers the relationships between language, communication and culture. Sections deal with the critical issues related to language acquisition, context and cognition; present an array of perspectives in analyzing the role of language in comparative cross-cultural and communication settings; and examine the role of first and second language usage in intergroup communication contexts. Working in the disciplines of psychology, ling

Learning Chinese Language and Culture May 19 2020 Learning Chinese Language and Culture is an intermediate level textbook,

which was intended to be used throughout the entire school year and designed mainly for students who have completed introductory courses of Chinese as a foreign language. Written in English, Traditional and Simplified Chinese, this book illustrates Chinese language knowledge and introduces Chinese culture in twentytwo lessons, covering a variety of cultural content, including customs and manners, holidays and festivals, poems and idioms, calligraphy and couplets, myths and legends, feng shui and superstitions, and historical relics and sceneries and many others. In every lesson, the authors have strived to maintain a clear topic and a coherent structure. They have also endeavored to keep the contents lively and achieve a fluent writing style while closely controlling the structure and grammar of every lesson.

Language, Culture, and Society Jul 21 2020 Why should we study language? How do the ways in which we communicate define our identities? And how is this all changing in the digital world? Since 1993, many have turned to *Language, Culture, and Society* for answers to questions like those above because of its comprehensive coverage of all critical aspects of linguistic anthropology. This seventh edition carries on the legacy while addressing some of the newer pressing and exciting challenges of the 21st century, such as issues of language and power, language ideology, and linguistic diasporas. Chapters on gender, race, and class also examine how language helps create - and is created by - identity. New to this edition are enhanced and updated pedagogical features, such as learning objectives, updated resources for continued learning, and the inclusion of a glossary. There is also an expanded discussion of communication online and of social media outlets and how that universe is changing how we interact. The discussion on race and ethnicity has also been expanded to include Latin- and Asian-American English vernacular.

***Language and Culture in the Intercultural World* Mar 09 2022** The intensification of contacts between cultures and languages has a major impact on all social spheres today. Multiculturalism and multilingualism are important elements of the local, regional, national and global community. Much of the world's conflict stems from the contrast between globalization and nationalism, fuelled by religions, racial divisions, traditions and other cultural particularities. Focusing mainly on the situation in Central and South-eastern Europe, this book addresses how cultural identities develop through tourism, education, literature and other social fields, and how language and literature teaching should be planned

in this context. It consists of the following sections: Language, Culture and Tourism; Interculturalism, Multilingualism and Approaches to Language Learning; and Culture in Literature and Translation. The volume will be of interest to teachers and researchers of cultural and tourism studies, linguistics and language learning, literary studies and translation, while also addressing wider readers interested in contemporary intercultural society.

Language and Culture Pedagogy Oct 04 2021 Looks at the teaching of language and culture in a globalized world.

Learning Chinese Language and Culture Jul 01 2021 Learning Chinese Language and Culture is an intermediate level textbook, which was intended to be used throughout the entire school year and designed mainly for students who have completed introductory courses of Chinese as a foreign language. Written in English, Traditional and Simplified Chinese, this book illustrates Chinese language knowledge and introduces Chinese culture in twentytwo lessons, covering a variety of cultural content, including customs and manners, holidays and festivals, poems and idioms, calligraphy and couplets, myths and legends, feng shui and superstitions, and historical relics and sceneries and many others. In every lesson, the authors have strived to maintain a clear topic and a coherent structure. They have also endeavored to keep the contents lively and achieve a fluent writing style while closely controlling the structure and grammar of every lesson.

Creolization of Language and Culture Feb 08 2022 This is an accessible book which makes an important contribution to the study of Pidgin and Creole language varieties, as well as to the development of contemporary European languages outside Europe.

***Teaching of Culture in English as an International Language* Sep 22 2020** The importance of integrating the teaching and learning of language and culture has been widely recognised and emphasized. However, how to teach English as an International Language (EIL) and cultures in an integrative way in non-native English speaking countries remains problematic and has largely failed to enable language learners to meet local and global communication demands. Developing students' intercultural competence is one of the key missions of teaching cultures. This book examines a range of well-established models and paradigms from both English-speaking and non-English speaking countries. Exploring questions of why, what, and how to best teach cultures, the authors propose an integrated model to suit non-native English contexts in the Asia

Pacific. The chapters deal with other critical issues such as the relationship between language and power, the importance of power relations in communication, the relationship between teaching cultures and national interests, and balancing tradition and change in the era of globalisation. The book will be valuable to academics and students of foreign language education, particularly those teaching English as an international language in non-native English countries.

Culture, Body, and Language Oct 12 2019 One of the central themes in cognitive linguistics is the uniquely human development of some higher potential called the "mind" and, more particularly, the intertwining of body and mind, which has come to be known as embodiment. Several books and volumes have explored this theme in length. However, the interaction between culture, body and language has not received the due attention that it deserves. Naturally, any serious exploration of the interface between body, language and culture would require an analytical tool that would capture the ways in which different cultural groups conceptualize their feelings, thinking, and other experiences in relation to body and language. A well-established notion that appears to be promising in this direction is that of cultural models, constituting the building blocks of a group's cultural cognition. The volume results from an attempt to bring together a group of scholars from various language backgrounds to make a collective attempt to explore the relationship between body, language and culture by focusing on conceptualizations of the heart and other internal body organs across a number of languages. The general aim of this venture is to explore (a) the ways in which internal body organs have been employed in different languages to conceptualize human experiences such as emotions and/or workings of the mind, and (b) the cultural models that appear to account for the observed similarities as well as differences of the various conceptualizations of internal body organs. The volume as a whole engages not only with linguistic analyses of terms that refer to internal body organs across different languages but also with the origin of the cultural models that are associated with internal body organs in different cultural systems, such as ethnomedical and religious traditions. Some contributions also discuss their findings in relations to some philosophical doctrines that have addressed the relationship between mind, body, and language, such as that of Descartes.

***Culture and Language Use* Nov 12 2019 The ten volumes of "Handbook of Pragmatics Highlights" focus on the most salient**

topics in the field of pragmatics, thus dividing its wide interdisciplinary spectrum in a transparent and manageable way. While other volumes select philosophical, cognitive, grammatical, social, variational, interactional, or discursive angles, this second volume reviews basic topics and traditions that place language use in its cultural context. As emphasized in the introduction, and as revealed in the choice of articles, culture is by no means to be seen as standing in opposition to society and cognition; on the contrary, the notion cannot be understood without insight into the intricate interactions of social and cognitive structures and processes. In addition to the topical articles, a number of contributions to this volume is devoted to aspects of methodology. Others highlight the role of eminent scholars who have made the study of cultural dimensions of language use into what it is today."

Teaching-and-learning Language-and-culture Apr 10 2022 Offers some theoretical innovations in teaching foreign languages and reports how they have been applied to curriculum development and experimental courses at the upper secondary and college levels. Approaches language learning as comprising several dimensions, including grammatical competence, change in attitudes, learning about another culture, and reflecting on one's own. Annotation copyright by Book News, Inc., Portland, OR

***Space and Time in Languages and Cultures Jul 13 2022* This volume offers novel insights into linguistic diversity in the domains of spatial and temporal reference, searching for uniformity amongst diversity. A number of authors discuss expression of dynamic spatial relations cross-linguistically in a vast range of typologically different languages such as Bezhta, French, Hinuq, Italian, Japanese, Polish, Serbian, and Spanish, among others. The contributions on linguistic expression of time all shed new light on pertinent questions regarding this cognitive domain, such as the hotly debated relationship between cross-linguistic differences in talking about time and universal principles of utterance interpretation, modelling temporal inference through aspectual interactions, as well as the complexity of the acquisition of tense-aspect relations in a second language. The topic of space and time in language and culture is also represented, from a different point of view, in the sister volume *Space and Time in Languages and Cultures: Language, Culture, and Cognition (HCP 37)* which discusses spatial and temporal constructs in human language, cognition, and culture in order to come closer to a better understanding of the interaction between shared and individual**

characteristics of language and culture that shape the way people interact with each other and exchange information about the spatio-temporal constructs that underlie their cognitive, social, and linguistic foundations.

Approaches to Language and Culture Aug 14 2022 This book provides an overview of approaches to language and culture, and it outlines the broad interdisciplinary field of anthropological linguistics and linguistic anthropology. It identifies current and future directions of research, including language socialization, language reclamation, speech styles and genres, language ideology, verbal taboo, social indexicality, emotion, time, and many more. Furthermore, it offers areal perspectives on the study of language in cultural contexts (namely Africa, the Americas, Australia and Oceania, Mainland Southeast Asia, and Europe), and it lays the foundation for future developments within the field. In this way, the book bridges the disciplines of cultural anthropology and linguistics and paves the way for the new book series **Anthropological Linguistics**.

***Language and Culture in Dialogue* Sep 15 2022** In this book, Andrew J. Strathern and Pamela J. Stewart delineate the relationship between “language in particular” and “culture in general” by focusing on language as both social practice and a means of classifying and interpreting the world. A traditional linguistic approach to a focus on language is illuminated by their anthropological emphasis on the embodiment of relationships and experience. In the book, the body is placed in the foreground for understanding language in culture, which helps in turn to understand how it enables us to adapt to the world of lived material experience. Written in an accessible style and drawing on an extensive corpus of primary field research from Papua New Guinea, Samoa, Japan, Taiwan, Scotland, and Ireland, Strathern and Stewart present a world anthropology which links together European, North American, and Asia-Pacific approaches to the topic. Students and scholars alike of sociocultural anthropology, linguistic anthropology, and linguistics will benefit from this engaging work on how the various components of our culture are informed and shaped through language.

Learning Language and Culture Via Public Internet Discussion Forums May 11 2022 Public Internet discussion forums offer opportunities for intercultural interaction in many languages on a vast range of topics, but are often overlooked by language educators in favour of purpose-built exchanges between learners.

The book investigates this untapped pedagogical potential.

Language and Material Culture Apr 29 2021 This innovative and provocative work introduces complexity theory and its application to both the study of language and the study of material culture. The book begins with a wide-ranging theoretical background, covering the areas of dialect geography, the anthropological study of material culture, and a general introduction to the study of complex adaptive systems. Following this general introduction, the principles of complexity theory are demonstrated in data drawn from linguistics and material culture studies. **Language and Material Culture** further highlights the principles of complexity through a series of case studies, using data from the Linguistic Atlas, colonial American inventories and the Historic American Building Survey. LMC shows that language and material culture are intertwined as they interact within the same cultural complex system. The book is designed for students in courses that focus on language variation, American English and material culture, in addition to general courses on applications of complex systems.

Language, Culture and Identity - Signs of Life Dec 06 2021 The dynamics of language, culture and identity are a major focus for many linguists and cognitive and cultural researchers. This book explores the inextricable connection that language has with cultural identity and cultural practices, with a particular emphasis on how they contribute to shaping personal identity. The volume brings together selected peer-reviewed papers from the 7th International Conference on Language, Culture and Mind with other specially commissioned chapters. Like the conference, this book aims to enhance mutual understanding among researchers from diverse disciplinary and theoretical perspectives, offering a wealth of insights to a wide range of readers on recent culturally oriented cognitive studies of language.

Language Dec 14 2019 A bold and provocative study that presents language not as an innate component of the brain—as most linguists do—but as an essential tool unique to each culture worldwide. For years, the prevailing opinion among academics has been that language is embedded in our genes, existing as an innate and instinctual part of us. But linguist Daniel Everett argues that, like other tools, language was invented by humans and can be reinvented or lost. He shows how the evolution of different language forms—that is, different grammar—reflects how language is influenced by human societies and experiences, and how it expresses their great variety. For example, the Amazonian Pirahã

put words together in ways that violate our long-held understanding of how language works, and Pirahã grammar expresses complex ideas very differently than English grammar does. Drawing on the Wari' language of Brazil, Everett explains that speakers of all languages, in constructing their stories, omit things that all members of the culture understand. In addition, Everett discusses how some cultures can get by without words for numbers or counting, without verbs for "to say" or "to give," illustrating how the very nature of what's important in a language is culturally determined. Combining anthropology, primatology, computer science, philosophy, linguistics, psychology, and his own pioneering—and adventurous—research with the Amazonian Pirahã, and using insights from many different languages and cultures, Everett gives us an unprecedented elucidation of this society-defined nature of language. In doing so, he also gives us a new understanding of how we think and who we are.

Language and Culture Nov 17 2022 This state-of-the-art exploration of language, culture, and identity is orchestrated through prominent scholars' and teachers' narratives, each weaving together three elements: a personal account based on one or more memorable or critical incidents that occurred in the course of learning or using a second or foreign language; an interpretation of the incidents highlighting their impact in terms of culture, identity, and language; the connections between the experiences and observations of the author and existing literature on language, culture and identity. What makes this book stand out is the way in which authors meld traditional 'academic' approaches to inquiry with their own personalized voices. This opens a window on different ways of viewing and doing research in Applied Linguistics and TESOL. What gives the book its power is the compelling nature of the narratives themselves. Telling stories is a fundamental way of representing and making sense of the human condition. These stories unpack, in an accessible but rigorous fashion, complex socio-cultural constructs of culture, identity, the self and other, and reflexivity, and offer a way into these constructs for teachers, teachers in preparation and neophyte researchers. Contributors from around the world give the book broad and international appeal.

Languages and Cultures in Contrast and Comparison Mar 29 2021 This volume explores various hitherto under-researched relationships between languages and their discourse-cultural settings. The first two sections analyze the complex interplay

between lexico-grammatical organization and communicative contexts. Part I focuses on structural options in syntax, deepening the analysis of information-packaging strategies. Part II turns to lexical studies, covering such matters as human perception and emotion, the psychological understanding of 'home' and 'abroad', the development of children's emotional life and the relation between lexical choice and sexual orientation. The final chapters consider how new techniques of contrastive linguistics and pragmatics are contributing to the primary field of application for contrastive analysis, language teaching and learning. The book will be of special interest to scholars and students of linguistics, discourse analysis and cultural studies and to those entrusted with teaching European languages and cultures. The major languages covered are Akan, Dutch, English, Finnish, French, German, Italian, Norwegian, Spanish and Swedish.

The Routledge Handbook of Language and Culture Oct 16 2022 The Routledge Handbook of Language and Culture presents the first comprehensive survey of research on the relationship between language and culture. It provides readers with a clear and accessible introduction to both interdisciplinary and multidisciplinary studies of language and culture, and addresses key issues of language and culturally based linguistic research from a variety of perspectives and theoretical frameworks. This Handbook features thirty-three newly commissioned chapters which cover key areas such as cognitive psychology, cognitive linguistics, cognitive anthropology, linguistic anthropology, cultural anthropology, and sociolinguistics offer insights into the historical development, contemporary theory, research, and practice of each topic, and explore the potential future directions of the field show readers how language and culture research can be of practical benefit to applied areas of research and practice, such as intercultural communication and second language teaching and learning. Written by a group of prominent scholars from around the globe, The Routledge Handbook of Language and Culture provides a vital resource for scholars and students working in this area.

Language and Culture Jan 19 2023 This work investigates the close relationship between language and culture. It explains key concepts such as social context and cultural authenticity, using insights from fields which includes linguistics, sociology, and anthropology.

What Is a Human? Dec 26 2020 In a sweeping synthesis of new research in a number of different disciplines, this book argues that we humans are not who we think we are. As he explores the

interconnections between cutting-edge work in bioanthropology, evolutionary biology, neuroscience, human language and learning, and beyond, James Paul Gee advances, also, a personal philosophy of language, learning, and culture, informed by his decades of work across linguistics and the social sciences. Gee argues that our schools, institutions, legal systems, and societies are designed for creatures that do not exist, thus resulting in multiple, interacting crises, such as climate change, failing institutions, and the rise of nationalist nationalism. As Gee constructs an understanding of the human that takes into account our social, collective, and historical nature, as established by recent research, he inspires readers to reflect for themselves on the very question of who we are—a key consideration for anyone interested in society, government, schools, health, activism, culture and diversity, or even just survival.

Teaching and Researching: Language and Culture Jan 15 2020

Language and culture are concepts increasingly found at the heart of developments in applied linguistics and related fields. Taken together, they can provide interesting and useful insights into the nature of language acquisition and expression. In this volume, Joan Kelly Hall gives a perspective on the nature of language and culture looking at how the use of language in real-world situations helps us understand how language is used to construct our social and cultural worlds. The conceptual maps on the nature of language, culture and learning provided in this text help orient readers to some current theoretical and practical activities taking place in applied linguistics. They also help them begin to chart their own explorations in the teaching and researching of language and culture.

Key Terms in Language and Culture Aug 22 2020 Key Terms in Language and Culture is a new collection of 75 short original essays written by leading scholars in linguistic anthropology and related fields, and covering the major issues in the contemporary study of language and culture. Together these essays provide a lexicon of language from an anthropological perspective. Each essay includes a brief description of a key concept, the issues associated with the concept, and the major contributions to its study. There is a set of suggested readings at the end of each essay that provides readers with a good starting point for a further study.

Language, Culture, and Teaching Sep 03 2021 Distinguished multiculturalist Sonia Nieto speaks directly to current and future teachers in this thoughtful integration of a selection of her key

writings with creative pedagogical features. Offering information, insights, and motivation to teach students of diverse cultural, racial, and linguistic backgrounds, examples are included throughout to illustrate real-life dilemmas about diversity that teachers face in their own classrooms; ideas about how language, culture, and teaching are linked; and ways to engage with these ideas through reflection and collaborative inquiry. Designed for upper-undergraduate and graduate-level students and professional development courses, each chapter includes critical questions, classroom activities, and community activities suggesting projects beyond the classroom context. **Language, Culture, and Teaching** • explores how language and culture are connected to teaching and learning in educational settings; • examines the sociocultural and sociopolitical contexts of language and culture to understand how these contexts may affect student learning and achievement; • analyzes the implications of linguistic and cultural diversity for classroom practices, school reform, and educational equity; • encourages practicing and preservice teachers to reflect critically on their classroom practices, as well as on larger institutional policies related to linguistic and cultural diversity based on the above understandings; and • motivates teachers to understand their ethical and political responsibilities to work, together with their students, colleagues, and families, for more socially just classrooms, schools, and society. **Changes in the Third Edition:** This edition includes new and updated chapters, section introductions, critical questions, classroom and community activities, and resources, bringing it up-to-date in terms of recent educational policy issues and demographic changes in the U.S. and beyond. The new chapters reflect Nieto's current thinking about the profession and society, especially about changes in the teaching profession, both positive and negative, since the publication of the second edition of this text.

Space and Time in Languages and Cultures Feb 20 2023 This is an interdisciplinary volume that focuses on the central topic of the representation of events, namely cross-cultural differences in representing time and space, as well as various aspects of the conceptualisation of space and time. It brings together research on space and time from a variety of angles, both theoretical and methodological. Crossing boundaries between and among disciplines such as linguistics, psychology, philosophy, or anthropology forms a creative platform in a bold attempt to reveal the complex interaction of language, culture, and cognition in the

context of human communication and interaction. The authors address the nature of spatial and temporal constructs from a number of perspectives, such as cultural specificity in determining time intervals in an Amazonian culture, distinct temporalities in a specific Mongolian hunter community, Russian-specific conceptualisation of temporal relations, Seri and Yucatec frames of spatial reference, memory of events in space and time, and metaphorical meaning stemming from perception and spatial artefacts, to name but a few themes. The topic of space and time in language and culture is also represented, from a different albeit related point of view, in the sister volume *Space and Time in Languages and Cultures: Linguistic Diversity (HCP 36)* which focuses on the language-specific vis-à-vis universal aspects of linguistic representation of spatial and temporal reference.

Interfaces Between Language and Culture in Medieval England Apr 17 2020 The twelve articles in this volume promote the growing contacts between medieval linguistics and medieval cultural studies generally. Articles address medieval English linguistics, and the interrelation in Anglo-Saxon England between Latin and vernacular language and culture.

Cultural Models in Language and Thought Feb 14 2020 A multidisciplinary collaboration exploring the role of cultural knowledge in everyday language and understanding.

Language, Culture and Social Connectedness Mar 17 2020 Diverse interest in language, pedagogy, identity and community has found expression through online interaction, networking and connectedness in the discourses captured in this book, *Language, Culture and Social Connectedness*. Issues surrounding language use in spoken, written and multimedia forms and in sociocultural responses, indigenous knowledges and ethnic perspectives are currently expanding, with consequential transnational implications for pedagogy in higher education. Language education is no longer oriented towards grammar, memorization and learning by rote, but rather using language and cultural knowledge as a means to communicate and connect to others around the globe. Geographical and physical boundaries are being transcended by technology as students learn to reach out to the world around them. This book explores the intricate relationships between language, culture and social connectedness in our diverse local and transnational communities. In a period of challenge in our history, there are tensions that connect and others that tend to disconnect endeavours across the social landscape. 'Connectedness' includes

relationships both formal and informal and the benefits those relationships bring to the individual as well as to society. 'Social connectedness' describes the level of engagement and trust an individual has with others in their community and the roles they take on, their friendships and participation in different activities. People who feel socially connected also contribute towards building communities and society. They help to create social capital as networks that promote effective social functions.

Language and Culture in Mathematical Cognition Nov 05 2021
Language and Culture in Mathematical Cognition, First Edition focuses on the role of linguistic and cultural factors in math cognition and development. It covers a wide range of topics, including analogical mapping in numerical development, arithmetic fact retrieval in the bilingual brain, cross-cultural comparisons of mathematics achievement, the shaping of numerical processing by number word construction, the influence of Head Start programs, the mathematical skills of children with specific language impairments, the role of culture and language in creating associations between number and space, and electrophysiological studies of linguistic traces in core knowledge at the neural level. Includes cutting-edge findings, innovative measures, recent methodological advances and groundbreaking theoretical developments Synthesizes research from various subdomains of math cognition research Covers the full complement of research in mathematical thinking and learning Informs researchers, scholars, educators, students and policymakers

Language, Media and Culture Jan 07 2022
Language, Media and Culture: The Key Concepts is an authoritative and indispensable guide to the essential terminology of the overlapping fields of Language, Media and Culture. Designed to give students and researchers 'tools for thinking with' in addressing major issues of communicative change in the 21st century, the book covers over 500 concepts as well as containing an extensive bibliography to aid further study. Subjects covered include: Authenticity Truthiness Structures of feeling Turn-taking Transitivity Validity claims With cross referencing and further reading provided throughout, this book provides an inclusive map of the discipline, and is an essential reference work for students in communication, media, journalism and cultural studies, as well as for students of language and linguistics.

Language, Culture, and Education Jun 19 2020 Exploring language, culture and education among immigrants in the United States, this

volume discusses the range of experiences in raising children with more than one language in major ethno-linguistic groups in New York. Research and practice from the fields of speech-language pathology, bilingual education, and public health in immigrant families are brought together to provide guidance for speech-language pathologists in differentiating language disorders from language variation, and for parents on how to raise their children with more than one language. Commonalities among dissimilar groups, such as Chinese, Korean, and Hispanic immigrants are analyzed, as well as the language needs of Arab-Americans, the home literacy practices of immigrant parents who speak Mixteco and Spanish, and the crucial role of teachers in bridging immigrants' classroom and home contexts. These studies shed new light on much-needed policy reforms to improve the involvement of culturally and linguistically diverse families in decisions affecting their children's education.

Language and Culture at Work Jun 12 2022 This book provides an overview of the complex role that culture plays in workplace contexts. In eight chapters, the authors cover the core aspects of culture at work from making decisions and negotiating power to gender and identity. Drawing on insights from a range of studies, they propose a new integrated framework for researching culture at work from a sociolinguistic perspective, and they apply it to the significant corpus of authentic workplace data they have collected from numerous settings in the UK, Hong Kong and New Zealand. This is key reading for researchers and recommended for advanced students of workplace and intercultural communication, sociolinguistics and discourse studies.
